| <p>患者主诉：三天前打篮球的时候，杵到了无名指，无名指肿了有三天，也不敢活动里面的关节。想问一下是不是骨折了。（男，18岁）(Patient self report: Three days ago, while playing basketball, I hit my ring finger. It has been swollen for three days, and I'm afraid to move the joint inside. I'm wondering if it's broken. (Male, 18 years old).)</p> <p>Doctor LLM：请问你觉得你的关节变形扭曲得厉害吗？(Doctor LLM: Do you think your joints are severely deformed and twisted?)</p> <p>患者模拟器：整个无名指都肿了，有点看不出里面有没有扭曲。(Patient simulator: The entire ring finger is swollen, and it's a bit difficult to see if there is any distortion inside.)</p> <p>Doctor LLM：疼痛的程度怎么样？你说不能活动里面的关节，是一活动就会疼得很厉害吗？(Doctor LLM: What is the degree of pain? Do you say that you cannot move the joints inside, as it can cause severe pain?)</p> <p>患者模拟器：是的，而且一活动里面的关节，就感觉里面什么东西在摩擦。(Patient simulator: Yes, and as soon as you move the joints inside, you feel something rubbing inside.)</p> <p>Doctor LLM：从你的描述，我觉得还是有骨折的迹象，建议你去医院拍个片子，确诊一下，然后根据骨折的情况再定治疗方案。(Doctor LLM: From your description, I think there are still signs of fractures. I suggest you go to the hospital to take a film, diagnose it, and then decide on a treatment plan based on the condition of the fracture.)</p> |
