Medical	Interviewing Skill			Reserve	Medical Interviewing Skill
1.1	Conduct disease-related inquiries accurately, including past history, medication history, comorbidities, etc., according to the patients' self reports	1. Revise to "accurately inquire about the patient's chief complaint, present medical history information such as accompanying symptoms and differential symptoms, and also inquire about past history, personal history, allergy history, etc." 2. Revise to "According to the patient's chief complaint, conduct relevant inquiries about the condition accurately, including the cause of the onset, the nature, degree, time and regularity of occurrence of symptoms, aggravating or alleviating factors, accompanying symptoms, diagnosis and treatment, other relevant medical history, etc."	Adopt Suggestion 2	Revise	Focusing on the patient's main complaint, make accurate inquiries about the condition, including the cause of the disease, the nature, degree, time and regularity of symptoms, aggravating or alleviating factors, accompanying symptoms, diagnosis and treatment, and other medical history such as past history, personal history, allergy history, etc.
1.2	Ask the patient with open-ended questions, encouraging the patient to speak up as appropriate				Ask the patient with open-ended questions, encouraging the patient to speak up as appropriate
1.3	Guide patients to obtain correct and sufficient disease-related information	Amended to "Guiding patients to provide"	Adopt	Revise	Guide patients to provide correct and sufficient disease-related information
1.4	Use words that patients understand and avoid medical jargon	1. Revised to read "Use plain language and avoid medical terminology, such as tenesmus, epistaxis, etc." 2. Revised to read "Avoid unintelligible medical terminology"	Adopt All	Revise	Use plain language and avoid difficult medical terms such as tenesmus, epistaxis, etc.
1.5	Explain to the patient the rationale or purpose of returning to the visit, treatment				Explain to the patient the rationale or purpose of returning to the visit, treatment
1.6	Avoid providing medically harmful information to patients, such as unsubstantiated health information, etc.				Avoid providing medically harmful information to patients, such as unsubstantiated health information, etc.
1.7	Make effective judgments and appropriate responses to medical emergencies that occur in patients, such as timely informing the risk of hypoglycemia and emergency treatment plans when the patient's blood sugar is lower than 3.2mmol/L			Reserve	Make effective judgments and appropriate responses to medical emergencies that occur in patients, such as timely informing the risk of hypoglycemia and emergency treatment plans when the patient's blood sugar is lower than 3.2mmol/L
1.8	For diseases that require a differential diagnosis, the patient will be actively asked and encouraged to state sufficient information to help identify the disease			Reserve	For diseases that require a differential diagnosis, the patient will be actively asked and encouraged to state sufficient information to help identify the disease
1.9	Inquiries are clear and focused			Reserve	Inquiries are clear and focused
2.0	Humanistic qualities			Reserve	Humanistic qualities
2.1	Demonstrate respect, sensitivity and empathy during consultations and communications			Reserve	Demonstrate respect, sensitivity and empathy during consultations and communications
2.2	Effective patient conversation skills include: opening the conversation, exploring the issue, understanding the patient's perspective, organizing the discussion, building a trusting relationship with the patient, facilitating patient participation, explaining, planning, and closing the discussion	Amended to "Establish a good doctor-patient relationship and gain the trust of patients"	Adopt	Revise	Effective patient conversation skills include: starting the conversation, exploring the issue, understanding the patient's perspective, organizing the discussion, building a good doctor-patient relationship and gaining the patient's trust, facilitating patient participation, explaining, planning, and closing the discussion
2.3	Reasonably respond to the patient's emotional performance during the conversation, such as appropriate emotional reassurance			Reserve	Reasonably respond to the patient's emotional performance during the conversation, such as appropriate emotional reassurance
2.4	Valuing patients' individual wishes in medical decision-making			Reserve	Valuing patients' individual wishes in medical decision-making
2.5	Avoid expressing opinions that are biased against certain groups of people			Reserve	Avoid expressing opinions that are biased against certain groups of people
2.6	Be patient when explaining problems to patients			Reserve	Be patient when explaining problems to patients
2.7	Communicate with patients using appropriate and appropriate language			Reserve	Communicate with patients using appropriate and appropriate language
2.8	Avoid inquiring about patient privacy when not necessary			Reserve	Avoid inquiring about patient privacy when not necessary
2.9	Reasonable handling of patients' non-medical appeals during dialogue			Reserve	Reasonable handling of patients' non-medical appeals during dialogue
3.0	Comprehensive diagnosis and treatment abilities of clinicians	Amended to "Diagnostic Reasoning Ability"	Not Adopt	Reserve	Comprehensive diagnosis and treatment abilities of clinicians
3.1	Identify the primary and secondary content of the information provided by the patient, and respond reasonably. For example, among the main complaints provided by the patient, the information that is helpful for judging the condition should be focused on and inquired about; , if the patient is more concerned about this, a reasonable explanation should be provided	Amended to read "Ability to identify chief complaint"	Not Adopt	Reserve	Identify the primary and secondary content of the information provided by the patient, and respond reasonably. For example, for the patient's main complaint, you should focus on and inquire about the information that is helpful for judging the condition; Patients are more concerned about this and need to provide a reasonable explanation
3.2	Recognize whether the information provided by the patient is credible and provide further verification if necessary, e.g. the patient states that he or she has a fever but does not take a temperature measurement	1. Amended to "whether the information is reliable" 2. Amended to "but the temperature measurement is not performed, the information is not reliable"	Adopt All	Revise	Identify whether the information provided by the patient is reliable and provide further verification if necessary, e.g. if the patient states that he or she has a fever but does not have a temperature measurement, the information is not reliable
3.3	Combine the information provided by the patient to arrive at a reasonable initial diagnosis and differential diagnosis	Amended to "preliminary diagnosis (suspected)"	Adopt	Revise	Combine information provided by the patient to arrive at a reasonable initial (suspect) and differential diagnosis
3.4	Propose an appropriate diagnostic protocol, that is, the diagnostic protocol should include necessary inspection methods and not include irrelevant inspection methods	1. Amend to "Consider the patient's condition and personal wishes, propose an appropriate diagnosis plan" 2. Amend to "In the case of insufficient diagnostic evidence, propose an appropriate clear diagnosis plan" 3. Amend to "Help to confirm the diagnosis means and does not include extraneous means”	Adopt All	Revise	Consider the patient's condition and personal wishes, and propose an appropriate plan for definite diagnosis when the diagnosis basis is insufficient. The plan should include necessary means that help to confirm the diagnosis and do not include irrelevant means
3.5	Correctly explain to the patient the reasons for the proposed diagnosis				Correctly explain to the patient the reasons for the proposed diagnosis
3.6	Correctly explain to patients the basis for diagnosis and exclusion	Amended to "Bases for excluding other differential diagnoses"	Adopt	Revise	Correctly explain to patients the basis for the diagnosis of the disease and the basis for excluding other differential diagnoses
3.7	Propose the best treatment plan considering the patient's condition and personal wishes	Revised to "propose the best treatment plan based on the patient's condition and diagnosis and treatment norms"	Adopt	Revise	Considering the patient's condition and personal wishes, combined with the patient's condition and diagnosis and treatment norms, propose the best treatment plan
3.8	Correctly explain to patients the reasons for proposed treatment options			Reserve	Correctly explain to patients the reasons for proposed treatment options
3.9	Make necessary reminders and suggestions to patients on certain important medical concerns, such as reminders of drug incompatibility			Reserve	Make necessary reminders and suggestions to patients on certain important medical concerns, such as reminders of drug incompatibility
4.0	Overall clinicalcompetence			Reserve	Overall clinicalcompetence
4.1	Dissatisfied			Reserve	Dissatisfied
4.2	Satisfactory			Reserve	Satisfactory
4.3	Very Good			Reserve	Very Good
