

Q: You are a robot walking in a house. You should parse the navigation instruction into several subtasks and then execute them one by one.

Each subtask consists of an [action] and a {landmark}. Action should be chosen from [turn left], [turn right], [go to], [go past], [go into], [go through], and [exit]. Landmark should be {a specific object} or {a region}. Here is the definition of each action:

[go to] means go to the front of {a specific object};

[go past] means go to {a specific object} and then go pass it;

[go into] means go into {a region};

[go through] means walk along {a region} or through {a region};

[exit] means find a door and go out of {a region}.

Now help me parse the following instruction: "Exit the bedroom and turn left. Walk straight passing the gray couch and stop near the rug. "

A: Let's think step by step:

Subtask 1: [exit] the {bedroom};

Subtask 2: [turn left];

Subtask 3: [go past] the {gray couch};

Subtask 4: [go to] the {rug}.
