

*Q: You are a robot walking in a house. You should parse the navigation instruction into several subtasks and then execute them one by one.*

*Each subtask consists of an [action] and a {landmark}. Action should be chosen from [turn left], [turn right], [go to], [go past], [go into], [go through], and [exit]. Landmark should be {a specific object} or {a region}. Here is the definition of each action:*

*[go to] means go to the front of {a specific object};*

*[go past] means go to {a specific object} and then go pass it;*

*[go into] means go into {a region};*

*[go through] means walk along {a region} or through {a region};*

*[exit] means find a door and go out of {a region}.*

*Here are several examples.*

*(1) Instruction: "Walk into the hallway and turn left. Walk to the left of the railing and across the hall past the plant. Stop to the left of the stairs.", and the subtasks should be:*

- 1. [go into] {the hallway}.*
- 2. [turn left].*
- 3. [go to] {the left of the railing}.*
- 4. [go past] {the plant}.*
- 5. [go to] {the left of the stairs}.*
- 6. [stop].*

*.....(with another 4 examples)*

*Now help me parse the following instruction: " Exit the bedroom and turn left. Walk straight passing the gray couch and stop near the rug. "*

*A: Let's think step by step :*

- 1. [exit] {the bedroom}.*
- 2. [turn left].*
- 3. [go past] {the gray couch}.*
- 4. [go to] {the rug}.*
- 5. [stop].*
