

A phylogenetic tree diagram showing the relationships between four species: Cat, Dog, Deer, and Panda. The tree is rooted at the bottom left. The main trunk splits into two major branches. The left branch leads to a node that splits into 'Deer' and 'Cat'. The right branch leads to a node that splits into 'Panda' and another node. This second node splits into 'Dog' and a third node. The third node splits into a blue star and 'AE'. An arrow points from the label 'AE' to the blue star.

Cat

AE
