

$\mathbf{X} \in \mathcal{X}$

Problem  
and Data  
Collection

Analyst  
Experience &  
External  
Information

Choose  
Analytic  
Method

$T(\mathbf{X}) \in \mathcal{Y}$

$\mathbf{y} = T(\mathbf{X} = \mathbf{x})$

Apply  
Method to Data  
and Observe  
Output

**Unexpected**

$\{\mathbf{y} \in \mathcal{E}^c\}$

Reconcile  
Observed vs.  
Expected Output

$\{\mathbf{y} \in \mathcal{E}\}$

**As-expected**
