```

Leveraging temporal dynamics as a learning signal
(Section 3.1)

Distilling knowledge from the future

Utilizing long-term temporal history
(Section 3.2)

Summarizing the historical information

Narrowing anticipation space by using additional information
(Section 3.3)

Multi-modal fusion
Conditioning on extra information

Incorporating uncertainty
(Section 3.4)

Using probabilistic approaches

Modeling at a more conceptual level
(Section 3.5)

Using action-level history
