

**Claim:** In the last 35 years of global warming, the sun has shown **a slight cooling trend**.

**Ground Truth Label:** **supports**

**Evidence:** A number of independent measurements of solar activity indicate the sun has shown a slight cooling trend since 1960, over the same period that global temperatures have been warming. Over the last 35 years of global warming, sun and climate have been moving in opposite directions.

**Large Language Models**

**Step 1**

**Prompt**

Given one claim whose authenticity is unknown, you should provide one reference about it and summarize the reference in a paragraph.  
Claim: <claim>

**LLM Response**

**Reference Generation**

According to “The Sun's Role in Climate Change” by NASA, while it is true that the Earth has experienced global warming over the last 35 years, the sun's energy output has been measured by satellites since 1978 and the data shows that the sun's energy **has been increasing slightly** during this time.

**Step 2**

**Prompt**

Given the claim and the reference, you should answer whether the claim is true or false.  
Claim: <claim>  
Reference: <reference>

**LLM Response**

**Claim Classification**

**False.** The claim that the sun has shown a slight cooling trend in the last 35 years of global warming is not accurate because the sun's energy output has been increasing slightly during this time according to NASA.

**Step 3**

**Classification Result:**  
**False**

**Ground Truth Label:**  
**supports**

... since 1978 and the data shows that the sun's energy **has been increasing slightly** during this time.
