

a) Task Vectors

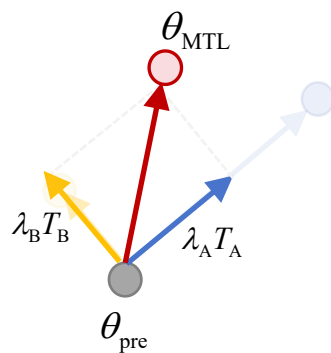

$$T_k = \theta_k - \theta_{pre}$$

b) Task Arithmetic

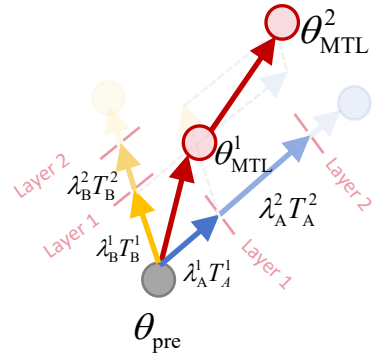

$$\theta_{MTL} = \theta_{pre} + \lambda(T_A + T_B)$$

c) Task-wise AdaMerging

$$\theta_{MTL} = \theta_{pre} + (\lambda_A T_A + \lambda_B T_B)$$

d) Layer-wise AdaMerging

$$\theta_{MTL} = \{\theta_{MTL}^l\}_{l=1}^2 = \{\theta_{pre}^l + (\lambda_A^l T_A^l + \lambda_B^l T_B^l)\}_{l=1}^2$$
