

Input Config.

```
<name>hadoop.ssl.hostname.verifier</name>  
<value>STRICT_I8</value>  
<description>The hostname verifier to provide for  
    HttpsURLConnections. Valid values are: DEFAULT, STRICT,  
    STRICT_I6, DEFAULT_AND_LOCALHOST and ALLOW_ALL  
</description> ...
```

Q: Are there any mistakes in the above configuration file?

A: The misconfiguration is the value of the property "hadoop.security.crypto.cipher.suite".
