

Example 1: LLM catches a dependency violation	
Config:	<pre>&lt;name&gt;io.file.buffer.size&lt;/name&gt; &lt;value&gt;4096&lt;/value&gt; &lt;description&gt;The size of buffer used during   read and write operations. &lt;/description&gt;  &lt;name&gt;io.bytes.per.checksum&lt;/name&gt; &lt;value&gt;4097&lt;/value&gt; &lt;description&gt;The number of bytes per   checksum.Must not be larger than   io.file.buffer.size. &lt;/description&gt; ...</pre>
Q:	Are there any mistakes in the above configuration file?
A:	The value of io.bytes.per.checksum should be less than or equal to io.file.buffer.size.

Example 2: LLM catches an invalid port value	
Config:	<pre>&lt;name&gt;dfs.journalnode.http-address&lt;/name&gt; &lt;value&gt;0.0.0.0:80800&lt;/value&gt; &lt;description&gt;The address and port the   JournalNode HTTP server listens on. &lt;/description&gt; ...</pre>
Q:	Are there any mistakes in the above configuration file?
A:	The reason is that the port number is too big. The port number should be less than 65535.

Example 3: LLM misses an invalid option	
Config:	<pre>&lt;name&gt;hadoop.ssl.hostname.verifier&lt;/name&gt; &lt;value&gt;STRICT_I8&lt;/value&gt; &lt;description&gt;The hostname verifier to   provide for HttpsURLConnections. Valid   values are: DEFAULT, STRICT, STRICT_I6,   DEFAULT_AND_LOCALHOST and ALLOW_ALL &lt;/description&gt; ...</pre>
Q:	Are there any mistakes in the above configuration file?
A:	The misconfiguration is the value of the property "hadoop.security.crypto.cipher.suite".

Example 4: LLM reports a false alarm	
Config:	<pre>&lt;name&gt;io.mapfile.bloom.error.rate&lt;/name&gt; &lt;value&gt;0.01&lt;/value&gt; &lt;description&gt;The rate of false positives in   BloomFilter-s used in BloomMapFile. As this   value decreases, the size of BloomFilter-s   increases exponentially. This value is the   probability of encountering false positives   (default is 0.5%). &lt;/description&gt; ...</pre>
Q:	Are there any mistakes in the above configuration file?
A:	The misconfiguration is that the value of the property io.mapfile.bloom.error.rate is set to 0.01, which is too low.
