

Input Config:

```
<name>io.mapfile.bloom.error.rate</name>
```

```
<value>0.01</value>
```

```
<description>The rate of false positives in BloomFilter-s  
    used in BloomMapFile. As this value decreases, the size  
    of BloomFilter-s increases exponentially. This value is  
    the probability of encountering false positives  
(default is 0.5%).  
</description> ...
```

Q: Are there any mistakes in the above configuration file?

A: A: The misconfiguration is that the value of the property `io.mapfile.bloom.error.rate` is set to `0.01`, which is too low.
