

deterministic mask

simple

easy  
optimizable

Magnitude-based

lower acc

low hardware  
requirement

expected  
sparsity

dynamic mask

complicated  
implementation

more  
parameters

Regularization-based

hard-decide  
hyperparameters

higher acc

uncontroable  
sparsity

simple

low hardware  
requirement

mask with  
randomness

Pruning with randomness

easy  
optimizable

expected  
sparsity

higher acc
