

Story Quality Evaluation Prompt

Please act as an impartial judge and evaluate the quality of the stories provided by two AI assistants. Your evaluation should consider factors such as grammaticality, coherence, engagement, etc. Begin your evaluation by comparing the two stories and provide a short explanation. Avoid any position biases and ensure that the order in which the stories were presented does not influence your decision. Do not allow the length of the responses to influence your evaluation. Do not favor certain names of the assistants. Be as objective as possible. After providing your explanation, output your final verdict by strictly following this format: \"[[A]]\" if story A is better, \"[[B]]\" if story B is better, and \"[[C]]\" for a tie.

Story A: **{story_a}**

Story B: **{story_b}**
