

There are seven people named A, B, C, D, E, F, and G with education levels being Bachelor's and PhD.

**Here are the given premises:**

i1: Among the 7 people, there are 3 PhDs, and 3 of them are female.

i2: The educational levels of A, B, and C are the same, while those of F and G are different.

i3: The genders of E, F, and G are the same, while the genders of A and D are different.

i4: Someone is a female PhD.

**Target:** which of the following can be concluded?

- a. A is a male PhD.
- b. F is a female PhD.
- c. G is not a male PhD.
- d. D is a female PhD.

**Generated determinate premises:**

**d1:** A, B, and C are Bachelors.

**d2:** E, F, and G are all males.

**d3:** B and C are females.

**d4:** D and E are both PhDs.

**d5:** C is a female bachelor.

**d6:** E is a male PhD.

**d7:** D is a female PhD.

**Conclusion:** The answer is d.
