

**Section 2: Targets and Challenges of Federated Unlearning**

- Targets of Federated Unlearning
- Challenges of Federated Unlearning

**Section 3: Preliminaries and Backgrounds**

- Machine Unlearning
- Federated Learning
- Federated Unlearning
- Attacks to ML Models

**Section 4: Federated Unlearning Methods**

- Passive Unlearning
- Active Unlearning
- Verification

**Section 5: FL-Tailored Optimizations, Limitations, and Applications**

- Constrained Resources
- Participant Heterogeneity
- Security and Privacy Threats
- Applications for enhanced security

**Section 6: Discussions and Promising Directions**

- Privacy-Preserving FU
- Verification and Proof of Unlearning
- Emerging Threats in Unlearning
- Awareness of Client-Dynamics
- Domain-Specific Applications
- Fairness and Explainability
- Integration with MLaaS

**Section 7: Conclusions**
