

Write a python function to check whether the given array is monotonic or not.

```
def is_Monotonic(array):  
    """  
    Check whether the given array is monotonic or not.  
  
    :param array: List of integers  
    :return: True if the array is monotonic, False otherwise  
    """  
    increasing = decreasing = True  
  
    for i in range(1, len(array)):  
        if array[i] > array[i - 1]:  
            decreasing = False  
        elif array[i] < array[i - 1]:  
            increasing = False  
  
    return increasing or decreasing
```

```
def is_Monotonic(arr):  
    """  
    Check whether the given array is monotonic or not.  
    Args:  
    arr (list): Input list of integers  
    Returns:  
    bool: True if the array is monotonic, False otherwise  
    """  
  
    for i in range(len(arr)-1):  
        if arr[i] > arr[i+1]:  
            increasing = False  
        if arr[i] < arr[i+1]:  
            decreasing = False
```
