

MBPP Example Task Code Generation

Write a python function to check whether the given array is monotonic or not.

CodeCoT

```
def is_Monotonic(array):
    """
    Check whether the given array is monotonic or not.
    :param array: List of integers
    :return: True if the array is monotonic, False otherwise
    """
    increasing = decreasing = True

    for i in range(1, len(array)):
        if array[i] > array[i - 1]:
            decreasing = False
        elif array[i] < array[i - 1]:
            increasing = False

    return increasing or decreasing
```

AgentCoder

```
def is_Monotonic(arr):
    """
    Check whether the given array is monotonic or not.
    Args:
    arr (list): Input list of integers
    Returns:
    bool: True if the array is monotonic, False otherwise
    """

    # Check if array is increasing or decreasing
    increasing = decreasing = True

    for i in range(len(arr)-1):
        if arr[i] > arr[i+1]:
            increasing = False
        if arr[i] < arr[i+1]:
            decreasing = False

    # Check if either increasing or decreasing flag is True
    return increasing or decreasing
```
