## Code Requirements

Complete the code snippet:  
`from typing import List`  
`def has_close_elements(numbers, threshold) -> bool:`  
 """ Check if in given list of numbers, are any two numbers closer to each other than given threshold.  
 >>> has\_close\_elements([1.0, 2.0, 3.0], 0.5)  
 False  
 >>> has\_close\_elements([1.0, 2.8, 3.0, 4.0, 5.0, 2.0], 0.3) True """

"Test Designer"

## Feedback Info

File "PATH/has\_close\_elements.py", line 13  
 >>> has\_close\_elements([1.0, 2.0, 3.0], 0.5)  
 ^^  
SyntaxError: invalid syntax

## Code Snippets

```
def has_close_elements(numbers, threshold) -> bool:
    for idx, elem in enumerate(numbers):
        for idx2, elem2 in enumerate(numbers):
            if idx != idx2:
                distance = abs(elem - elem2)
                if distance < threshold:
                    return True
        return False
```

## Test Cases

### 1. Basic Test Cases:  
`assert has_close_elements([1.0, 2.0, 3.0], 0.5) == False`  
`assert has_close_elements([1.0, 1.4, 3.0], 0.5) == True`

### 2. Edge Cases:  
`assert has_close_elements([], 0.5) == False`  
`assert has_close_elements([1.0], 0.5) == False`  
`assert has_close_elements([1.0, 1.0], 0) == True`

### 3. Large Numbers:  
`large_list = [i * 0.1 for i in range(10000)]`  
`assert has_close_elements(large_list, 0.0999) == False`
