

SUMMARY: UAV Operations

RE-691

DESCRIPTION:

The RealTimeFlightUI shall allow users to apply flight operations to one or more UAVs.

SUMMARY: Following UAVs

RE-695

DESCRIPTION:

The RealTimeFlightUI shall allow users to follow one or multiple UAVs on the map.

## high-level

SUMMARY: Assign routes to UAV

DD-647

DESCRIPTION:

The user shall select a UAV and then assign routes to it from an available route list.

SUMMARY: Applying emergency operations

DD-694

DESCRIPTION:

When requested by the user the UI shall apply the requested emergency action to all selected UAVs; if no UAV is selected the UI shall apply the emergency action to all UAVs by default.
