

Original code

```
def factorial(n):
    if n == 0:
        return 1
    else:
        return n * factorial(n - 1)
```

Original code

```
def factorial(n):
    if n == 0:
        return 1
    else:
        return n * factorial(n - 1)
```

Input

```
def fact[X]
    if n == 0:
        return 1
    [Y]
    return n [Z] - 1 )
```

Input

```
def factorial ( n ) :
    if [X]:
        [Y]
    else:
        return [Z]
```

Target

```
[X] orial(n):
[Y] else:
[Z] * factorial(n
```

Target

```
[X] n == 0
[Y] return 1
[Z] n * factorial(n - 1)
```
