

## Changes After Review

1. Added DSC 85.66% and 6.2 seconds to the abstract as the reviewer proposed.
2. Added more thorough literature review in related work.
3. Added percentages in Fig.2.
4. Changed the SAH column to SAH volume in Table2
5. Added explanation to the formula  $IPH+IVH+(IPH\&IVH)$
6. Rephrased from “Normalize the input scan to the 0–1 range by subtracting the mean value and dividing the standard deviation value.” to “Normalize the input scan by subtracting the mean value and dividing the standard deviation value.”
7. Moved formula 1 from “4.3 Implementation details” to “5.3 Diagnostic accuracy” to make Table2 easier to understand.
8. Corrected spelling and syntax errors in the text to improve readability.
