

## System description

Memory A:  
1) Volatile  
2) Suitable for...

Program binary,  
source code  
[if available]

**Frontend  
LLM**

Generated  
embeddings

**Backend  
Prediction  
Model**

Decisions

Data  
placement

Data  
movement

Compute  
scheduling

H/W counters,  
Page table accesses
