

The sequence of images depicts

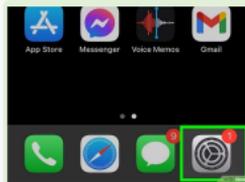

a robot picking and putting objects down on a wooden surface, demonstrating grasp planning in 3d.

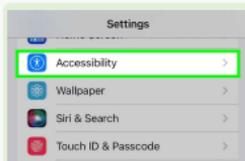

The sequence of images depicts

a fence being created on the screen by selecting materials and using them. This is important in showing that Minecraft will allow players to create their own structures, tools & weapons, as well as provide decoration for landscapes through the game's crafting mechanics.

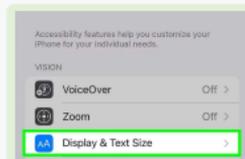

## How to Make Your iPhone Screen Black and White or Grayscale

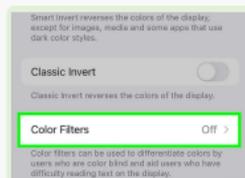

Step 1: Open your iPhone's Settings iPhone Settings App Icon. You'll see this gray gear icon on your Home screen or in your App Library.

Step 2: Tap Accessibility. It's in the third group of settings.

Step 3: Tap Display & Text Size.

Step 4: Scroll down to Color Filters and turn it on. This will allow you access the black & white, grayscale options below in the same section of settings (Display Settings).

Step 5: Tap on Grayscale. This is the filter we want to select for black & white or grayscale mode.
