 **CVE-2016-6494 Detail**

Description

The client in MongoDB uses world-readable permissions on .dbshell history files, which might allow local users to obtain sensitive information by reading these files.

Weakness Enumeration

CWE-ID	CWE Name
CWE-200	Exposure of Sensitive Information to an Unauthorized Actor

VulTeller

The FILE before VERSION does not verify that use of the permissions on history files, allows local guest to read sensitive information by reading these files.
