

# 1. Bayesian ANN Training

Learnable Params:  $\lambda$  (BayesBiNN)

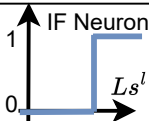

## 2. Re-training for hardware

Learnable Params:  
 $\lambda$  (BayesBiNN), Step Size(SGD)

## 3. SNN conversion

IF with learned thresholds,  
quant.  $p = \sigma(2\lambda)$

## 4. Transfer to hardware

Map parameters to Bayesian SNN Accelerator
