

### [ Query ]

How do I convert a String to an int in Java?

---

### [ Reasoning Prompt ]

(1) Task intent of the query. Action is 'convert'; Object is 'a String'; Target is 'an int'; Condition is 'in Java'.

(2) Factual knowledge of the API. Functional description is 'parse the string argument as a signed decimal integer'.

Functionality category is 'convert/transform/parse'.

(3) Fine-grained Match. First, 'convert' belongs to the category. Next, 'a String' aligns with 'the string argument', 'an int' aligns with 'a signed decimal integer', 'in Java' aligns with the Java API.

**Therefore**, the recommended API is 'java.lang.Integer.parseInt()'.

---

### [ Recommended API ]

java.lang.Integer.parseInt()

...

Please recommend some suitable APIs for the given query.
