

[Query]

How do I convert a String to an int in Java?

[Reformulated Query]

Convert a String to an int in Java.

[Reason Prompt]

First, conduct intent exploration on the reformulated query. Its action is 'convert', object is 'a String', target is 'an int', condition is 'in Java'.

Second, perform knowledge detection on Java official API documentation based on the intent. The suitable description is 'parse the string argument as a signed decimal integer'.

Therefore, the recommended API is 'java.lang.Integer.parseInt()'.

[Recommended API]

java.lang.Integer.parseInt()

...

Please recommend some suitable APIs for the given query.
