Task 1/3: Colored Sprites
An AI model was trained to classify images of sprites by shape: "square" or "oval". You will be providing feedback on the model errors within "square" images.

AI models often focus on the wrong thing, and you can help by describing what wrong thing they're focusing on. Enter phrases below that complete a sentence like:

"The AI is often wrong with images that have

Enter phrase here...

Inspect Proposed Error

Results:
You will see the percentage of images the AI is correct on for images with and without the phrase. Click on a phrase to see the corresponding split. We sort the phrases by a score between 0~1 which indicates how well the prompt is splitting the data. A good score for this task is **0.6**. Try out 'red', and compare with other prompts.
