

```
1 public class MotivationCase {  
2     public void getName(JsonObject jo) {  
3         String name = null;  
4         name = jo.get("name");  
5  
6         int length = name.length();  
7         System.out.println("Name Length: " + length);  
8  
9         return name;  
10    }  
11}
```
