

(a) Domain knowledge

Atom-Bond property

Atom information

Bond information

Substructure

Functional group

Fragment

Pharmacophore

Chemical reaction

Synthesis

Decomposition

Molecular property

Classification

Property relation

Prior
knowledge

Heuristic
guided
design

Molecular property prediction

(c) Training strategy

Unlabeled data

Self-supervised

Semi-supervised

Targeted data

Transfer learning

Multi-task learning

Untargeted data

(d) Model architecture

RNN-based

Transformer-based

GNN-based

CNN-based

Multi-modality-based

Contrastive
learning

Modality
fusion

(b) Molecular modality

Sequence-based

SMILES

Descriptor

IUPAC
