...prägung von Segesta mit einem Anhang der Hybriden, Teilstücke und Tetradrachmen sowie mit einem Überblick über die Bronzeprägung. As the title indicates, this book is primarily a catalog of the didrachms struck by the city of Segesta. Beginning with the first issue in 475/70 BC, long after its immediate neighbors had already been minting the denomination, this book traces this coinage through the following 80 years, when Segesta ceased minting didrachms in favor of tetradrachms. The catalog, divided into four distinct periods, consists of a die study listing each obverse and reverse die pair, accompanied by a record of examples in major collections and auction catalogs. Perhaps most welcome among the appendices are additional die studies of Segesta's silver fractions and tetradrachms, as well as a brief overview of the bronze issues of the fifth and fourth centuries BC. Other appendices cover known examples of local hybrids (dies of Segesta used with coin dies of its immediate neighbors), ancient imitations and *fourrés*, and modern fa

... hing. # With the rise of the "tall buildings" came a growing unease that the motifs of the past were no longer adequate to express not only the new forms of the skyscraper but also the spirit of what was becoming to be seen as the "modern" age. We can see the results of this transition as we examine the buildings of the 18th and early 20th century and watch as their architects shed the stylizations of the past while attempting to find an architecture fitting for the present. Eventually, by the mid-20th century they proceed to an expression of form based on a building's function and its use of materials. - DJB, 10 Mar. 2004 # (Not shown) U. S.
