... ing from a system change. These concerns were primarily addressed by SaaS providers through a communicated set of policies around the timing and interface impact of system updates. The second was being able to craft an SLA that cloud providers would accept that still met the burden of internal and external audit. There were three areas of particular concern. Some SaaS providers had a written policy of providing advanced notice of any updates or patches at the software level. The second concern was around changes to application interfaces. Service Level Agreements (SLAs) There were several open issues reported with crafting cloud service provider SLAs. This was a particular challenge when communicating potential risk to internal and external auditors. Responses varied significantly in this area. Some respondents pointed to the European Network and Information Security Agency's (ENISA's) 3 release of a set of evaluation criteria for cloud service providers as a potential baseline for future cloud provider assessments. Update and System

... Since this includes doctors and engineers you really want to believe that quality principles govern their actions! $\text{\textcircled{a}}$ From a definition of what a profession was, he pointed out the impact of professions on an economy that is now 70 service based. Alas there is very little in traditional Quality Standards, such as ISO that can be used to govern a profession. He gave a very interesting historical view of the guilds starting in 7th century BC and through the 13th and 15th century supplanted by scientific thought and the industrial revolution. $\text{\textcircled{a}}$ He then spent most of his discussion on the difference between the professional associations and the professional regulatory bodies, showing how the professional regulatory bodies do actually follow the principles of quality, albeit without a formal international standard. He even did a QFD exercise for a professional activity to show the parallels. $\text{\textcircled{a}}$ The whole presentation was an eye opener to me and it was well received by the others. $\text{\textcircled{a}}$ Dear readers and ASQ colleagues, I am thrilled and excited
