

# Framework

## SzSCORE

### Data format

- EDF**
- 256 Hz
  - unipolar
  - 10-20 electrodes

- TSV**
- start, duration
  - SCORE sz types
  - channels

# Benchmark

## 10-20 seizure detection

### Datasets

CHB-MIT Scalp EEG	23	198	982 h
TUH EEG Sz Corpus	675	4029	1476 h
Sienna Scalp EEG	14	47	128 h
SeizelT1	42	182	4211 h

### Evaluation methodology

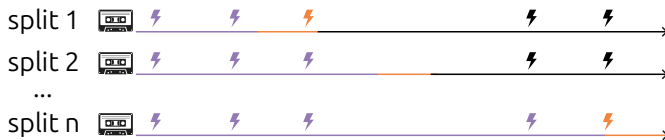

Subject-independent models

*leave subjects out*

Personalized models

*time series cross-validation*

### ML task

**Input Data**

10-20 scalp EEG

**Task**

Segment seizures

**Output**

onset, duration

**Models**

Personalized

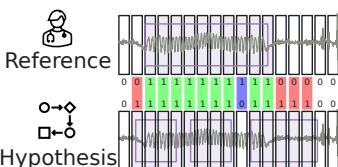

Subject-independent  
on a single dataset

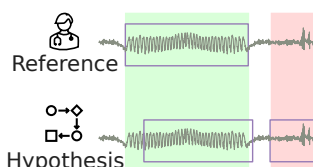

Subject-independent  
across datasets

### Performance metrics

#### Sample-based scoring

#### Event-based scoring

True Positives False Negatives False Positives

### Reporting

**Model Card**

- Model details
- Software doc
- Data
- Results & Metrics

**Sample & Event Metrics**

- Sensitivity
- Precision
- F1-score
- False alarms / day
