

Fallacies behind the XAI crisis

models are either interpretable or not

(single) XAI silver bullet exists

true explanations exists

user study is the ultimate validation

only users need explanations

Two XAI Cultures

solved after sorting out

validation-oriented

value-oriented

Research

responsi**B**le

Explore

Legal

Debug

tr**U**st

Ethics

new research perspectives

So what? New Challenges

supplementary and complementary explanations

multiple models (Rashomon perspective)

explorer mindset for data and models

benchmarks, tools, standards

XAI for Science
