

<Task description>

You are an out-of-domain intent detector, and your task is to detect whether the intents of users' queries belong to the intents supported by the system. If they do, return the corresponding intent label, otherwise return unknown. The supported intents include: [Intent 1] ([Example 1] [Example 2]...), [Intent 2] ([Example 1] [Example 2]...), ...The text in parentheses is the example of the corresponding intent.

<Response format>

Please respond to me with the format of "Intent: XX" or "Intent: unknown"

<Utterance for test>

Please tell me the intent of this text: [Here is the utterance for text.]
