

+ improved pretraining

A horizontal arrow pointing from the BERT node to the RoBERTa node, with the text '+ improved pretraining' above it.

-----

A horizontal dashed line connecting the BERT node to the AIBERT node.

+ improved pretraining

A horizontal arrow pointing from the AIBERT node to the AIBERT v2 node, with the text '+ improved pretraining' above it.

*training involves dynamic masking, full-sentence training without NSP loss, large mini-batches, and using a larger byte-level BPE.*

*Bidirectional Encoder Representations from Transformers*

*A Lite BERT*

*different dropout rates, additional training data, and longer training*
