

Quality Estimation Methods

Handcrafted Features Based

- QuEst
- QuEst++
- Tree-based QE

Deep Learning Based

Classic Deep Learning Methods

- SHEF-NN
- QUETCH
- RNN-QE
- Predictor-Estimator
- deepQuest
- Word emb & discourse for QE
- Pre-Est with stack propagation
- Bilingual Expert Model
- DirectQE
- APE-QE
- First Purely Neural QE
- Syntactic Features for QE
- FULLSTACKEDQE
- Improving QE with NN features
- Transformer & BAL & Pseudo-PE

Large Language Models Based

- GEMBA
- EAPrompt
- KPE
- INSTRUCTSCORE
- Generation Probability of LLMs for QE
- Multi-view Fusion
- Fine-Tuned LLM for QE
- Fine-Grained EA & LLM

Methods Incorporating Pre-trained LMs

- Pre-Est Based Transformer
- Pre-Est Based XLM & Transformer
- Adapter Tuning for QE
- Pre-trained Translation Application for QE
- TransQuest
- Importance of Log Probability
- COMET
- COMETKIWI
- QE with Levenshtein Transformer
