

Here are more detailed instructions for how to choose the most appropriate triggering word.

Goal: Look for the one word that MOST LIKELY manifests the event's occurrence. You can use the following priority order for annotation:

- 1. Most of the times, the trigger of the event will be the **main verb** in the sentence.
- 2. If the verb is ambiguous/vague, the trigger would be a **noun** semantically related to the event.
- 3. (Rare case) If no such noun exist, the trigger would be any **adjective/adverb** that is related to the event.
- 4. If still confused, use your best judgement to select the trigger.

In the following illustrations, correct trigger words are marked **blue**.

CASE I : main verb

Example Sentence: "I was coughing and got a fever yesterday and today confirmed I did not get COVID"

Annotation: There are 2 events of symptom

- a. ...**got** a fever...-->Event symptom.
- b. ...was **coughing**... -->Event symptom.
- c. Note 1: "fever" and "COVID" are Not marked as triggering word of the events since the main verbas indicate the event.
Note 2: Here, due to the presence of "and", we have two occurrences of the event symptom.
- d. **Although "get COVID" appears, "not" is the negation emphasizing no infection happens, so event infect does NOT occur**
- e. More examples of main verbs as triggering word:

| Example | Event |
|--------------------------------------|---------|
| fight against the pandemic | control |
| caught a flu | infect |
| recover from COVID | cure |
| COVID takes lives | death |
| prevent infection | prevent |
| stomach hurts | symptom |
| number of infection increases | spread |

CASE II : nouns

Example Sentence: "Fever, cough, and headache are the most common symptoms of COVID"

Annotation: Here we have 1 event of symptom event:

- a. ...**symptoms** -->Event symptom.
- b. Note: "fever","cough", and "headache" manifest the symptom event but they are NOT triggering words because "symptom" better manifests the Event.
- c. More examples of nouns as triggering word:

| Example | Event |
|-----------------------------|---------|
| death rate | death |
| therapy for COVID | cure |
| infection prevention | prevent |
| control of spread | control |
| signs of infection | symptom |
| spreading of COVID | spread |
| infection rate | infect |

CASE III : adjective

Example Sentence: "I am feverish since 2 days ago"

Annotation: Here we have 1 event of the symptom event

- a. ...**feverish** -->Event symptom.
- b. Note: Here, we do not have a strong verb/noun for marking the trigger. Thus we mark "feverish".
- c. More examples of nouns as triggering word:

| Example | Event |
|------------------------------------|---------|
| get rid of disease | cure |
| stay cautious against virus | prevent |
| contagious virus | infect |
