```

Episode task based approaches

- **Meta-learning for detection task**
- **Fusion of episode tasks with RPN**
- **Fusion of episode tasks with transformer**
- **Exploring interclass relationships**

Single task based methods

- **Jointly fine-tuning based architecture**
- **Two-stage fine-tuning approaches**
- **Knowledge distillation**
- **Context dependence**
- **Decoupling detection networks**
- **Keeping the performance on base categories**

All two-stage training based methods following the transfer learning concept
