

## Text-to-Vis Without Lexical and Phrasal Variability:

NL: Draw a **bar chart** about the change of **salary** over **hire\_date**, sort x axis in asc order.

Database: HR\_1

|             |             |             |        |     |
|-------------|-------------|-------------|--------|-----|
| employees   | EMPLOYEE_ID | HIRE_DATE   | SALARY | ... |
| job_history | JOB_ID      | EMPLOYEE_ID | ...    |     |

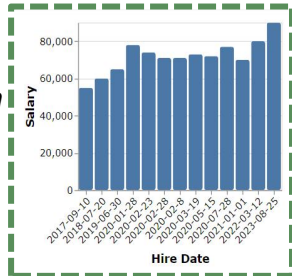

PK ← FK

The corresponding specification in Vega-Lite(✓):

```
{
  "data": { ... },
  "mark": "bar",
  "encoding": {
    "x": {
      "field": "HIRE_DATE",
      "sort": "ascending",
      ...
    },
    "y": { "field": "SALARY", ... }
  }
}
```

Execution

Visualization Chart:

## Text-to-Vis With Lexical and Phrasal Variability:

NL: Please give me a **histogram** showing the change in **wage** over the **date of hire** in ascending manner.

Database: HR\_1

|             |             |             |           |     |
|-------------|-------------|-------------|-----------|-----|
| employees   | EMPLOYEE_ID | SALARY      | HIRE_DATE | ... |
| job_history | JOB_ID      | EMPLOYEE_ID | ...       |     |

PK ← FK

The corresponding specification in Vega-Lite(✗):

```
{
  "data": { ... },
  "mark": "histogram",
  "encoding": {
    "x": {
      "field": "data of hire",
      "sort": "ascending",
      ...
    },
    "y": { "field": "wage", ... }
  }
}
```

Execution

No Chart due to the error in specification
