

## Original Data Matrix

$$\begin{bmatrix} \mathbf{x}_1 & \mathbf{x}_2 & \cdots & \mathbf{x}_{n-1} & \mathbf{x}_n \end{bmatrix}$$

$$\mathbf{X}_1^{n-1} \quad \mathbf{X}_2^n = \mathbf{A}\mathbf{X}_1^{n-1} \quad \mathbf{X}_2^n$$

**Data-stacking Technique**

## Augmented Data Matrix

$$\begin{bmatrix} \mathbf{x}_1 & \mathbf{x}_2 & \cdots & \mathbf{x}_{n-s} & \mathbf{x}_{n-s+1} \\ \mathbf{x}_2 & \mathbf{x}_3 & \cdots & \mathbf{x}_{n-s+1} & \mathbf{x}_{n-s+2} \\ \vdots & \vdots & \ddots & \vdots & \vdots \\ \mathbf{x}_s & \mathbf{x}_{s+1} & \cdots & \mathbf{x}_{n-1} & \mathbf{x}_n \end{bmatrix}$$

$$\mathbf{X}_{aug,1} \quad \mathbf{X}_{aug,2}$$

$$\mathbf{X}_{aug,2} = \text{diag}[\mathbf{A} \ \mathbf{A} \ \cdots \ \mathbf{A}]\mathbf{X}_{aug,1}$$
