

Please reply with a Python 3 solution to the below problem. Make sure to wrap your code in '```python' and '```'

Markdown

delimiters, and include exactly one block of code with the entire solution

(in the final code step). You will also be given a textbook section relevant to the given problem. Feel free to use that to aid your problem solving process.

Reason through the problem and:

1. Restate the problem in plain English
2. Conceptualize a solution first in plain English
3. Write a pseudocode solution
4. Output the final Python solution with your solution steps in comments.

No outside libraries are allowed.
