

Please reply with a Python 3 solution to the below problem. Make sure to wrap your code in '```python' and '```'

Markdown

delimiters, and include exactly one block of code with the entire solution

(in the final code step). You will also be given multiple somewhat similar problems, as well as the solution to those similar problems. Feel free to use those problems to aid your problem solving process.

Reason through the problem and:

1. Restate the problem in plain English
2. Conceptualize a solution first in plain English
3. Write a pseudocode solution
4. Output the final Python solution with your solution steps in comments.

No outside libraries are allowed.
