

Definition of rule:

If p then q; not q, therefore not p

Instructions: Understand the below examples to learn the connection between sentences and how they have been used. Use that understanding to generate coherent sentences.

Examples:

p: Liam finished his work early.

q: He will order pizza for dinner.

Context: If Liam finished his work early, then he will order pizza for dinner.

Question: If he won't order pizza for dinner, does this imply that Liam didn't finish his work early?

Answer: yes

p: Lisa gets an A in the class.

q: She will reward herself with a trip.

Context: If Lisa gets an A in the class, then she will reward herself with a trip.

Question: If she won't reward herself with a trip, does this imply that Lisa gets A in the class?

Answer: no

p: Benjamin is going to the beach.

q: He will go swimming.

Context: If Benjamin is going to the beach, then he will go swimming.

Question: If he won't go swimming, does this imply that Benjamin isn't going to the beach?

Answer: yes

Instruction for Formatting

- 1. Generate only one pair of p, and q based on the above understanding.***
- 2. Generate each sentence in a new line.***
- 3. Do not generate p, and q prefixes.***
