

## **I. Introduction**

- I-A. State-of-the-Art and Our Contributions
- I-B. Structure of the Survey

## **II. Intelligent Internet of Things: State-of-the-Art**

- II-A. Machine/Deep Learning-based IIoT
- II-B. Deep Reinforcement Learning-based IIoT
- II-C. Federated Learning-based IIoT
- II-D. Visions of the Use of AI in IIoT

## **III. IIoT Applications**

- III-A. IIoT-based Smart Healthcare
- III-B. IIoT-based Smart City
- III-C. IIoT-based Smart Transportation
- III-D. IIoT-based Smart Industry
- III-E. Lesson Learned

## **IV. Security Issues in IIoT**

- IV-A. Network Attacks
- IV-B. Confidentiality
- IV-C. Integrity
- IV-D. Intrusion
- IV-E. Countermeasures

## **V. Privacy Issues in IIoT**

- V-A. Privacy: Concepts and Principles
- V-B. Data Privacy Leakage
- V-C. Location Privacy Leakage
- V-D. Model Privacy Leakage
- V-E. Countermeasures
- V-F. Lessons Learned

## **VI. Challenges and Future Directions**

- VI-A. Resource Management in IIoT
- VI-B. Learning Model Design in IIoT
- VI-C. Fairness in IIoT
- VI-D. Economic Issues in IIoT
- VI-E. IIoT in Future Wireless Networks
- VI-F. Model Drif in IIoT Networks

## **VII. Conclusion**
