

- Set of nodes: \mathcal{N}
- Set of leaf nodes: \mathcal{N}^L
- Parent of node n : $a(n)$
- Children of node n : $\mathcal{C}(n)$
- Siblings of node n : $\mathcal{S}(n)$
- Stage containing node n : $t(n)$
- Path from root node to node n : $\mathcal{A}(n)$
- Path from root node to $a(n)$: $\mathcal{P}(n)$
- Total probability of node n , i.e., of realization $\{\xi_m\}_{m \in \mathcal{A}(n)}$: p_n
