

```
n = int(input())
A = input()
b = input()
c = input()
ans = 0
for i in range(n):
    a = {A[i], b[i], c[i]}
    if (len(a) == 2):
        ans += 1
    if (len(a) == 3):
        ans += 2
print(ans)
```

Change the style of this code into the Python standard

Here's the updated code in Python standard style:

python

 Copy code

```
n = int(input())
A = input()
b = input()
c = input()
ans = 0

for i in range(n):
    a = {A[i], b[i], c[i]}
    if len(a) == 2:
        ans += 1
    if len(a) == 3:
        ans += 2

print(ans)
```
