

Original Audio Caption	An adult male is speaking, a motor is running, rhythmic vibration, and water is gurgling	
Generation Prompt	<p>I would like you to expand an audio descriptions with the following requirements:</p> <ul style="list-style-type: none"> • Each expanded description should be around 100 words, providing more details based on the brief sound descriptions, without introducing any new sounds. • The expanded descriptions should focus on depicting the scene where the sounds occur, the feelings they evoke, the auditory experience, and the way the sounds are produced, rather than directly describing the sounds themselves. • Incorporate elements of a story such as setting, characters, and plot development to create a more immersive and engaging experience. • While it is not necessary to meet all the above requirements simultaneously, prioritize the fluency and coherence of the language. 	
Long Narrative Text	<p> In a quiet suburban neighborhood, an adult male stands in his garage, speaking animatedly on his phone. The steady hum of a motor running fills the background, blending seamlessly with his deep, resonant voice. Each word he utters is punctuated by the rhythmic vibration of a nearby washing machine, its cyclical motions creating a soothing, predictable pattern. The air is warm and slightly humid, carrying the faint scent of detergent. In the corner, a hose feeds into a drain, where water gurgles gently, adding a soft, melodic undertone to the scene. Together, these sounds weave a tapestry of domestic tranquility, evoking a sense of home and routine amidst the hustle of daily life.</p>	<p> As the adult male's voice carries through the air, it's as if he's sharing a secret with the world. His words are laced with conviction, and his tone is reassuring. The hum of the motor provides a gentle background melody, its steady beat a reminder of the machinery's steady work. The rhythmic vibration emanating from it is almost palpable, like the thrum of a harp string. Meanwhile, the water gurgling in the distance is like a soothing brook, its gentle babble a counterpoint to the motor's steady pulse. The combination of sounds creates a sense of calm, as if the world is unfolding at a peaceful, deliberate pace.</p>
