

An Example of Accuracy Node Template

Considering a user: {User info}

Here's a list of the candidate movies: {Candidate List}

Your reranking goal: {Goal}

Your historical reranking: {Historical Reranking Pool}

Now, you need to focus on the accuracy aspect (the match between the user and items) and rerank the candidates based on the given information, and then give suggestions about the next step of reranking from the following reranking nodes considering the goal: {Available Nodes}

For your response format: {Format Description}
